## Driving Change with CMS: Your All-in-One EV Charging Solution

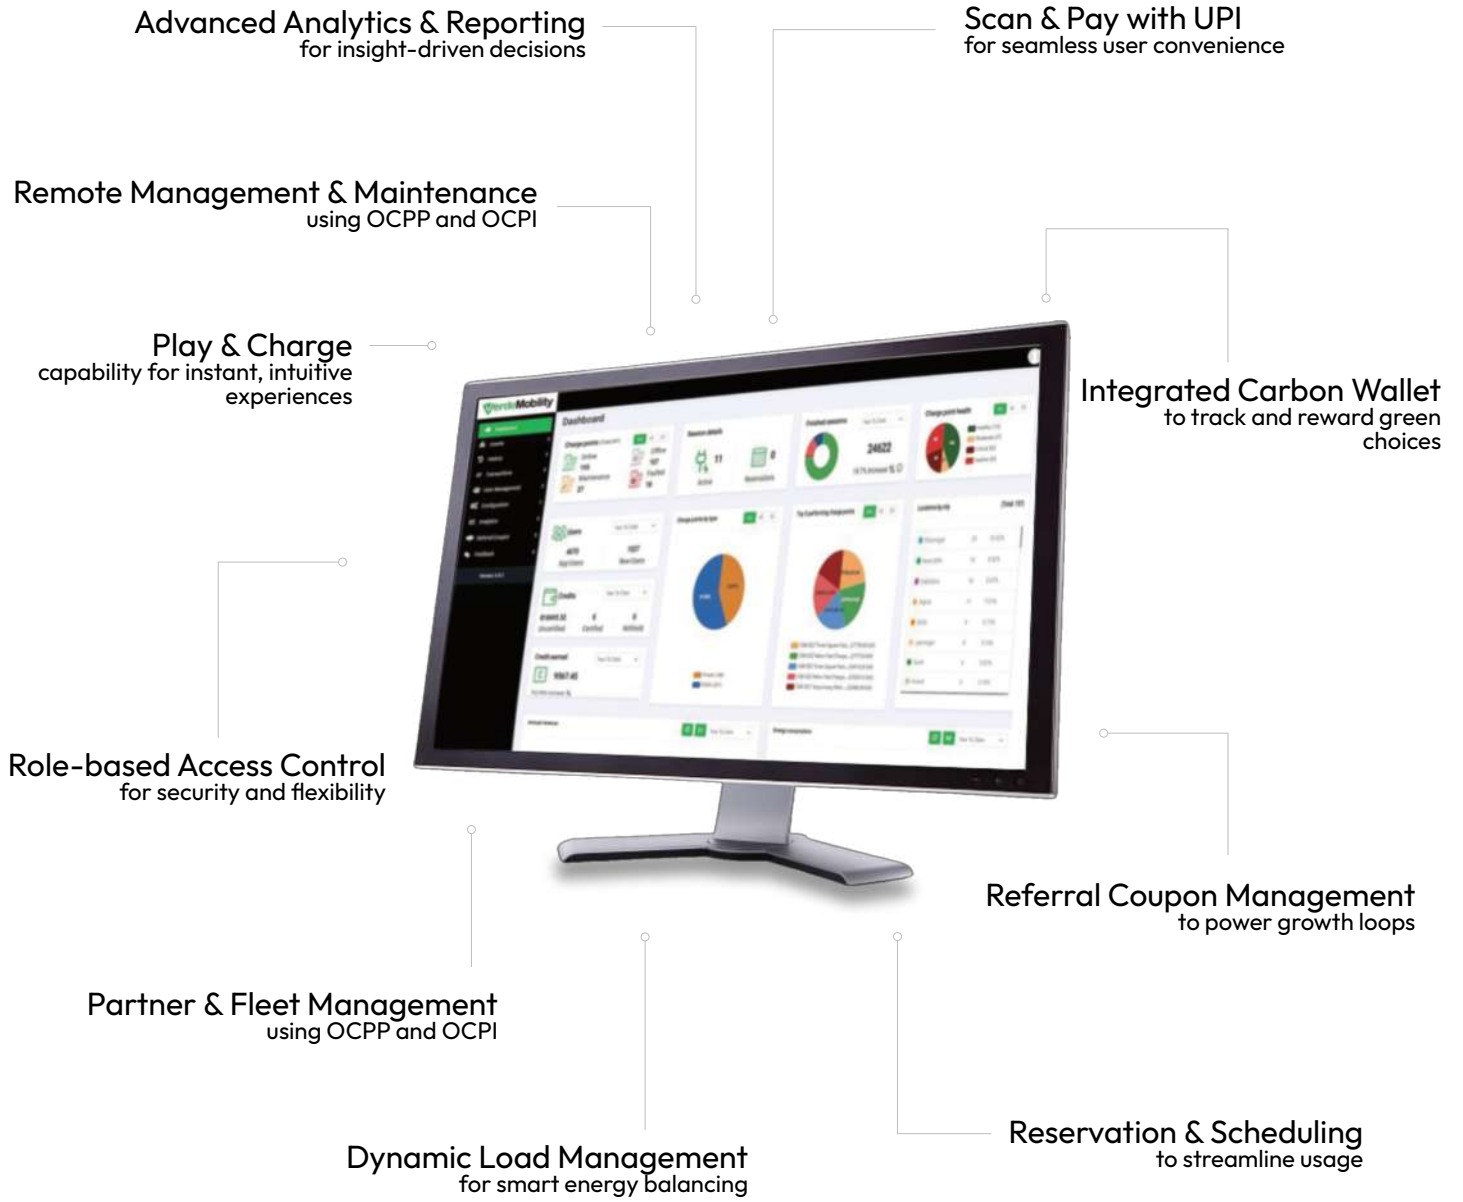

**VerdeMobility** leverages the expertise of its parent company, System Level Solutions (SLS), to develop sustainable and innovative ecosystem solutions using IoT and cloud technology. Our Central Management System operates on the principle of bridging the gap between intelligent hardware and software.

Our **IoT and cloud-based Central Management System (CMS)** is built to power the next generation of energy and mobility infrastructure. Designed with flexibility, scalability, and user experience in mind, it offers end-to-end visibility and control through a robust platform that integrates seamlessly across the EV, solar, utility, and smart infrastructure domains.

From **remote charge point management using OCPP and OCPI** to **real-time user experiences**—our CMS enables businesses to deploy smart infrastructure faster, operate more efficiently, and scale with confidence.

# Built-in Intelligence. Built for Scale.

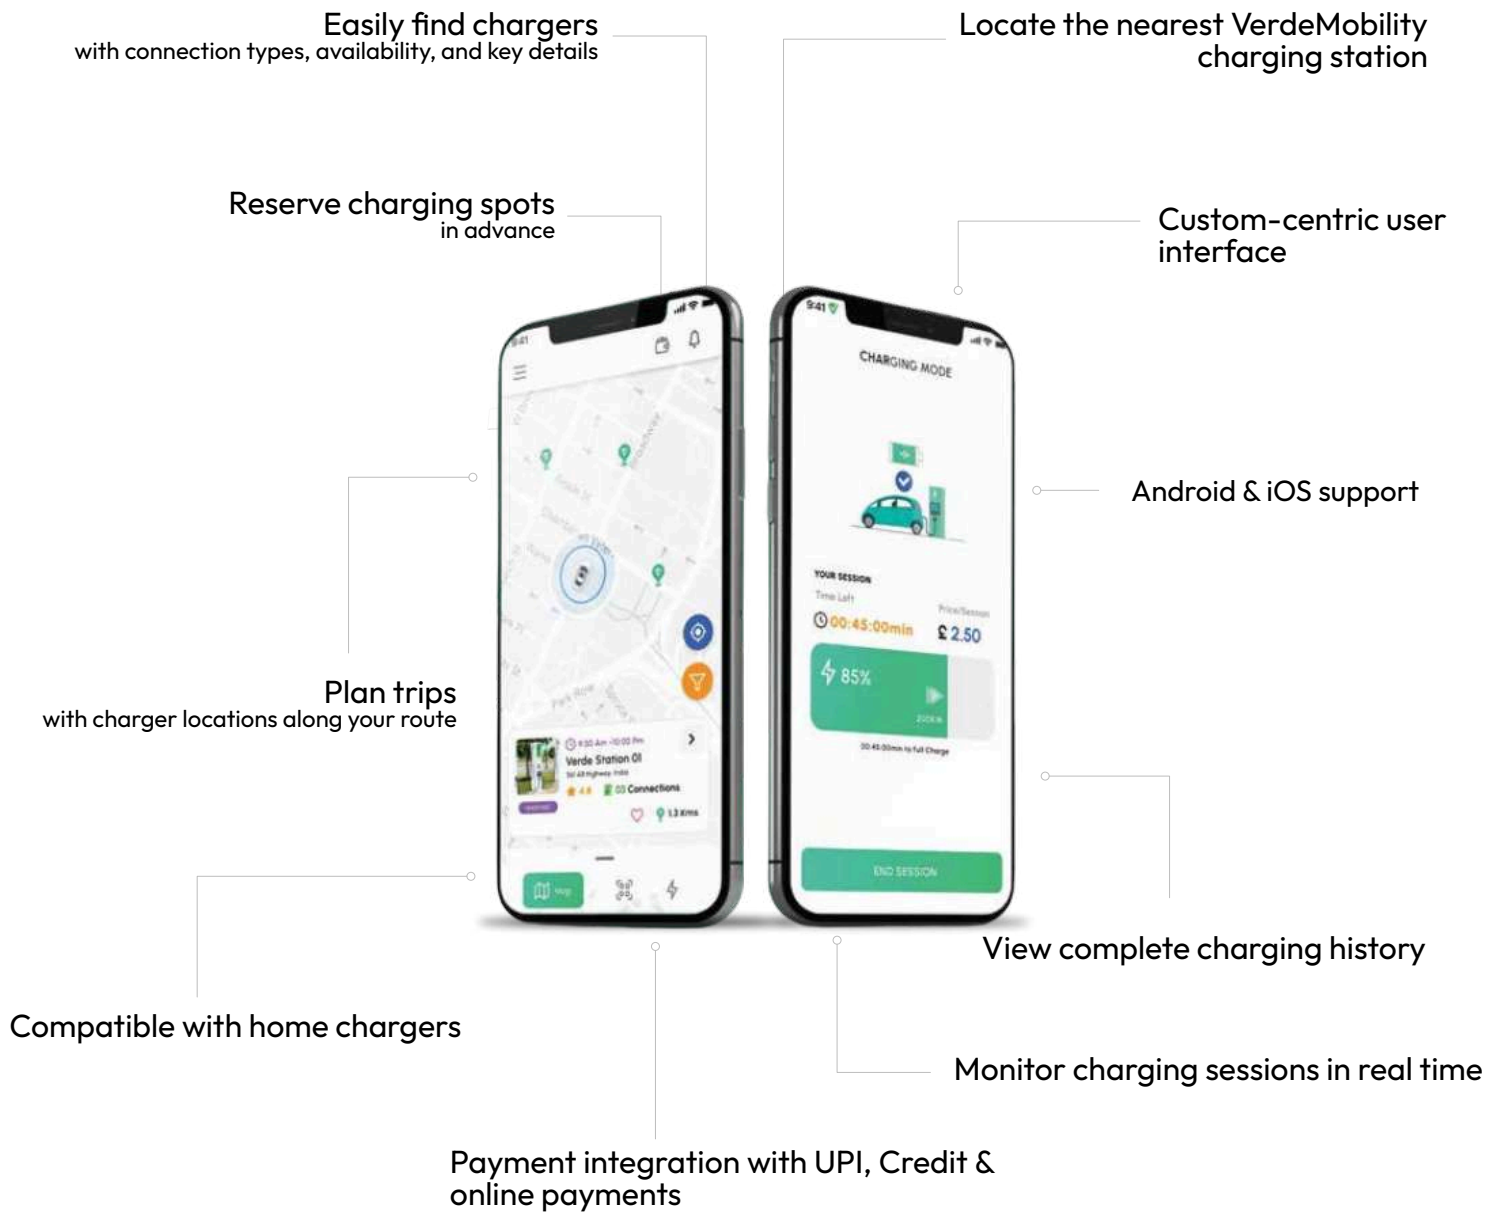

Whether you're looking to deploy, manage, or expand your clean energy infrastructure, our CMS is designed to give you full control—with the tools to **build your brand**, optimize operations, and deliver unmatched user experiences.

# Mobile Application

We offer mobile app to support end-user management. This app can be used by end-users of Infrastructure, Fleet and Business to manage their charging needs.

# About VerdeMobility

VerdeMobility is a subsidiary of a 24+ years old System Level Solutions (SLS) which offers ecosystem solution for electric mobility. With our in-house, Made-in-India hardware and software technology solutions for electric mobility, going *Verde* is reliable, safe and sustainable.

We believe that well-engineered, sustainable ecosystem solutions backed by innovative technology can promote electric mobility adoption.

Go *Verde* with our innovative, made-in-India technology solutions for electric mobility. We provide, EV charging solutions, integrating advanced IoT technology for seamless management.

Our Offerings Includes:-

## EV-Chargers

AC chargers 3.3 kw to 44 kW chargers for homes, businesses, CPOs, Dealership, fleets, Infra and DC chargers 30 kW to 240 kW for fleets and infrastructure

## IoT Solutions

Smart AC-DC charger controllers, CMS, and mobile applications for real-time monitoring and control.

## Customized Offerings

Tailored mobility, customization, and ecosystem support to enhance EV adoption

## Ecosystem Support

EV simulators and fleet electrification calculators to optimize efficiency and sustainability
